

STEP 1: Creating Time for Change

Productivity for Functional Leadership Teams GenAI Coaching Workshops

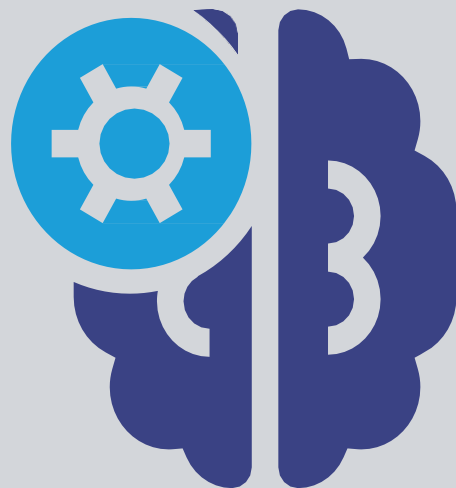

Reclaim 20% of Your Function's Time and Redefine How You Lead, Together.

A 3-hour, high-impact GenAI session for senior leadership teams unlock a 20% uplift your team's functional performance

After experiencing GenAI as a personal productivity partner, it's time to scale the shift, across your leadership team.

“ This session transformed my life—and my team's. The clarity, speed and impact have been exponential.
CXO, Financial Services ”

“ We've used TIP's TEAM framework to transform the next layer down. GenAI is doing work we once outsourced—at speed, at quality, at a fraction of the cost ”
COO, Property Sector

STEP 1 TEAM is a 3-hour, hands-on session for up to 10 leaders. Co-led by TIP and you as the C-suite functional leader, it empowers your team to partner with GenAI as a **thinking collaborator**, not just a tool, and to solve real business problems in real time. You'll model how GenAI reshapes not only execution, but leadership. "This isn't a workshop. It's a mindset shift." and you won't need a prompt sheet again.

Structure: The Proven Three-Part Journey

1. Simulate

Your team steps into a CxO simulation using GenAI to interpret strategic decks, prepare onboarding plans, and build influence with internal personas. This rewires how they approach clarity, prompting, and cognition.

2. Solve

Working in 2–3 groups, your team will apply GenAI to real, pre-set functional challenges (e.g. pricing, onboarding, strategy decks, transformation comms). Together, you'll get outcomes are **immediate, relevant, and reusable**.

3. Reflect

Your team can analyse how GenAI affected their decisions, biases, and team dynamics. The function leader co-leads this with TIP, demonstrating a "lead from within" shadow and reinforcing that **everyone means everyone**. And, if your team's **average NPS is 6 or less, you don't pay**. That's how confident we are in the impact.

What You'll Walk Away With

- Three GenAI-powered solutions to functional priorities
- 20%+ uplift in efficiency and effectiveness: **strategic clarity, alignment, and throughput**
- A function-wide shift in **confidence, language, and pace**
- Empowered leaders ready to cascade GenAI-first thinking to their teams

What Comes Next: Lead into STEP 1 FUNCTIONAL

This session creates **time and alignment**. Now you're ready to go deeper. Once your team creates time, they can finally use it to rethink how the entire function operates. With a new GenAI-first mindset embedded and strategic time unlocked, your team can now step into the next stage where together, we redesign, experiment, and validate the future of your function.

"You don't need another roadmap. You need the space to reinvent. Now you have it."
